EDUCATION

• IIITDM Kancheepuram

B.Tech in Electronics & Communication Engineering (GPA: 7.65)

Chennai, India

July 2019 - June 2023

SKILLS SUMMARY

- **Languages:** JavaScript (ES6+), SQL, Python, HTML5, CSS3, Java (Basic)
- **Technologies:** React.js, Node.js, Express.js, AWS (DynamoDB, Lambda, S3), RESTful APIs
- **Tools & Practices:** Git, Jenkins, Postman, Agile/Scrum, DevOps, Test-Driven Development
- **Architectures:** Client-Server, Microservices (basic), Full Stack Development
- **Databases:** MongoDB, PostgreSQL, MySQL

PROFESSIONAL EXPERIENCE

• Transformative Learning Solutions

Software Engineer

Gurgaon, India

October 2023 - Present

- Developed and maintained application lifecycle management systems with Express.js and AWS DynamoDB, ensuring seamless integration across the development pipeline.
- Implemented full-stack solutions following DevOps practices with continuous integration via Jenkins, reducing deployment time by 45%.
- Architected microservice-based component system supporting 15+ unique elements with complete CRUD functionality.
- Managed the full lifecycle of changes from development to deployment using agile methodologies in cross-functional teams.
- Designed and integrated performance monitoring achieving 99.9% system uptime and response time under 200ms.
- Applied test-driven development principles resulting in 40% fewer production bugs and improved code quality.
- Led continuous improvement initiatives that increased warehouse efficiency by 40% across multiple locations.

• Nokia Solutions and Networks

Student Trainee (Internship)

Chennai, India

August 2022 - May 2023

- Built client-server architecture solutions visualizing data from 200+ network nodes simultaneously.
- Collaborated in agile Scrum teams to deliver software features meeting strict telecommunications industry requirements.
- Implemented test-driven development practices to ensure code reliability and maintainability.
- Developed efficient API integration protocols following microservices principles for real-time data processing.

PROJECTS

• Application Lifecycle Management System

React.js, Node.js, Express.js, DevOps Tools

Full Stack Web Application

<https://github.com/harshajavvaji>

- Designed and implemented a role-based application management system with CI/CD pipeline integration.
- Created RESTful APIs with authentication and tiered access control following clean code principles.
- Applied microservices architecture and test-driven development for improved system reliability.

• Promptopia

Next.js, Tailwind CSS, MongoDB

AI Prompt Sharing Platform

<https://promptopia-smoky.vercel.app/>

- Developed robust client-server architecture with full CRUD functionality across multiple features.
- Implemented agile development practices with iterative feature releases and continuous integration.
- Created 12+ custom API routes with comprehensive error handling following clean code principles.
- Applied DevOps methodologies for streamlined deployment and maintenance workflows.

• Blogit

React, Express.js, MongoDB

Content Management Platform

bloggit-frontend.onrender.com

- Developed full stack blogging platform using test-driven development for core functionality.
- Implemented DevOps practices with automated testing and continuous deployment pipeline.
- Built scalable architecture with microservices principles for improved maintenance and feature development.
